

Central axis of  
the targets and of  
the system

Axis of  
rotation of the  
sample holder

Sample

Sample holder  
(carousel)

Mask

A mobile shutter can  
be inserted in between  
the mask and the  
sample holder

Opening in the mask to  
permit deposition on  
the sample

Distance between  
the electrodes

Angle of  $15^\circ$  between a  
target axis and the  
system axis

Magnetron  
tube

Water cooling  
in and output
