

POSITION

You are the Chief Executive of the Intellectual Property Office in Bria and as such your interest is to secure IP and protect the interests of investors like Medormar Corporation who benefited massively from governmental funding and invested in R&D at Bria National University. Patents for common good is not your priority, but protecting investors' rights and incentivizing innovation.

CONFLICT

Domestic conflict with Minister for Science and Technology of Bria:

While you are somewhat willing to compromise on patents to support common good (but only if these patents do not disincentivise innovation), your national Minister for S&T is pushing strongly for the Bria's "quantum tech for global good" agenda.

Conflict with Director of the Lauze Patent and Trademark Office:

Similar to the Bria Minister for Science and Technology's position, the Director of the Lauze Patent Office is also determined to ensure that quantum technology can be used for global good purposes.
