CONFLICT

Conflict with nation of Bria:

As Managing Director for Ideas Commons, you are negotiating licenses of patents with other countries at low cost. This would allow them to develop affordable quantum technologies and applications in line with your objective to make quantum computing accessible to all. Your openness may be in conflict with the economic interests prioritised by the Bria government, who are generally unwilling to share the technology unless it is in their best interests to do so.

Conflict with private sector:

The funding for the Ideas Commons NGO mostly comes from major tech company donors that Ideas Commons often needs to campaign against to get patent concessions. This implies potential conflicts with Betude Corp and Medormar Corp.
