COMPUTER SEMINAR

Tuesday, 15 September
16.30
Theory Conference Room

"Computers in Space Research"
George H. Ludwig / NASA

Abstract : The different portions of the information systems used in space science research impose unique demands on the design and use of the computers involved. On the spacecraft, primary consideration must be given to operational problems (reliability, weight, power requirements, etc.) whereas the ground data processing involve extremely large amounts of data and require high adaptability of programs in the later stages of the analysis in order to explore alternative hypotheses.

The possible impact of technological advances such as more powerful lightweight computers, very large mass memory systems and better data communications links, will be discussed.

CERN PARTICLE PHYSICS SEMINAR

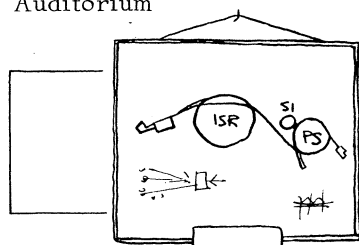

Wednesday, 16 September
16.30
Auditorium

"A summary of experimental results on weak interactions presented at the Kiev Conference"
K. Winter / CERN

CERN COLLOQUIUM

Thursday, 17 September
16.30
Auditorium

"Bubble chamber Data Processing : Giant Chambres and Higher Rates"
P. Hough / Brookhaven

COURS DE LANGUES

enseignement

Inscriptions aux cours 1970 - 1971

Nous vous rappelons que les bulletins d'inscription doivent être renvoyés au Secrétariat des Cours de Langues avant le 18 septembre 1970.

Des bulletins d'inscription supplémentaires sont disponibles aux Secrétariats des Divisions et du Service de l'Enseignement (Bât. 57, 2e étage tel. 31.27 et Bât. 5, 4e étage tel. 28.44).
