CERN NUCLEAR PHYSICS SEMINAR

Monday, September 1
11.00
Theory Conference Room

"Nuclear resonance effects in hadronic atoms",
by M. Leon / Rutherford Laboratory

CERN PARTICLE PHYSICS SEMINARS

Tuesday, September 2
16.30
Auditorium

" Ψ chology : Theory and phenomenology of the new particles",
(Rapporteur talk on the new particles at the SLAC Conference),
by H. Harari / Weizmann Institute

Tuesday, September 9
16.30
Auditorium

"Report on the SLAC Conference",
by D. Treille / CERN

JOINT ISR / MPS SEMINARS

Wednesday, September 3
16.30
ISR Auditorium
(top floor of Building 30)

"Cooling and storage of antiprotons",
by H.S. Dikanski / Novosibirsk

Friday, September 5
10.00
ISR Auditorium
(top floor of Building 30)

"Report on the ISABELLE summer study at BNL"
(Physics and machine),
by A. Hofmann, C. Rubbia, W. Schnell, W. Willis / CERN

ESO ASTROPHYSICS SEMINAR

Wednesday, September 3
16.30
ESO Conference Room
(Building 593 - R001-007)

"Supernova remnants",
by John Danziger / ESO

Abstract : A survey of new data with emphasis on the optical
wavelength region will be given for supernova remnants
in the Southern Milky Way and the Magellanic Clouds.
