Tel: 76 72405 (Paul) ou 76 72216 (Pierre)

The club would like to wish all of our members a very happy new year. The coming year will see a number of changes for the Record Club. The most important concerns a new opening time, or more precisely opening day.

As from Wednesday 14 January 1998 (the first opening day of 1998) the club will be open **ON WEDNESDAYS ONLY**, the opening hours will remain the same as before 12:30 to 13:00 & 17:30 to 18:00 but **WEDNESDAYS ONLY** so please take note.

We would also like to remind all present members that now is the time to renew your membership for 1998, the membership fee has NOT changed and remains 18 CHF.-. Members have until the end of February to renew.

As from the 1st of March all dockets of those members that have NOT renewed will be removed and these people will have to re-enrol and pay the enrolment fee of 10 CHF.-. So if you want to avoid this charge **RENEW YOUR MEMBERSHIP BEFORE THE END OF FEBRUARY.**

As in the past the POP CD selection committee will endeavour to find 10 new POP CDs each month for the club. However, this committee would like suggestions from club members of new CDs to purchase, so if you want to see the CDs that **YOU** like in the club give your recommendations to the committee.

SOFTBALL CLUB

All-Purpose General Meeting

This year's CERN Softball Club APGM will be held on Wednesday 28 January at 5.30 p.m. in Restaurant n°1 (the Coop). All members and interested parties are both invited and encouraged to attend. Elections for an executive committee for 1998 will be held and proposed activities for the upcoming season will be discussed. A quorum is necessary for the elections to be valid.

A complete agenda for the meeting can be found on the world-wide web at

<http://Softball.cern.ch/APGM-Agenda.html>.

Any recommended amendments or modifications to the agenda must be given to the president or e-mailed to Softball@cern.ch by Monday 26 January.

Anyone wishing to participate, who is not directly associated with CERN, is asked to please contact:

Club president
Steven Goldfarb
Phone: 767-6965
E-Mail: Steven.Goldfarb@cern.ch

to arrange entrance to the CERN site.

Le Club

The CERN Softball Club plays slow-pitch softball from March to September against other teams from the Geneva area. For more information, contact us:

- E-Mail: softball.club@cern.ch
- WWW: <http://softball.cern.ch>
- Usenet: cern.softball
- Phone: +41.22.767.6965

"Is there anything else you want us to do?"

- Rose Bowl MVP Brian Griesse

Evening Lecture Series

TUESDAY 3 FEBRUARY 1998, at 8.30 p.m.
Main Auditorium

ART & PHYSICS

Parallel visions in space, time and light

by Dr. Leonard SHLAIN

Throughout his life, Dr. Leonard Shlain has combined a broad interest in science and medicine with an ongoing fascination for the art and humanities. Born in 1937 in Detroit, he attended the University of Michigan and graduated with honours from Wayne State University Medical School.

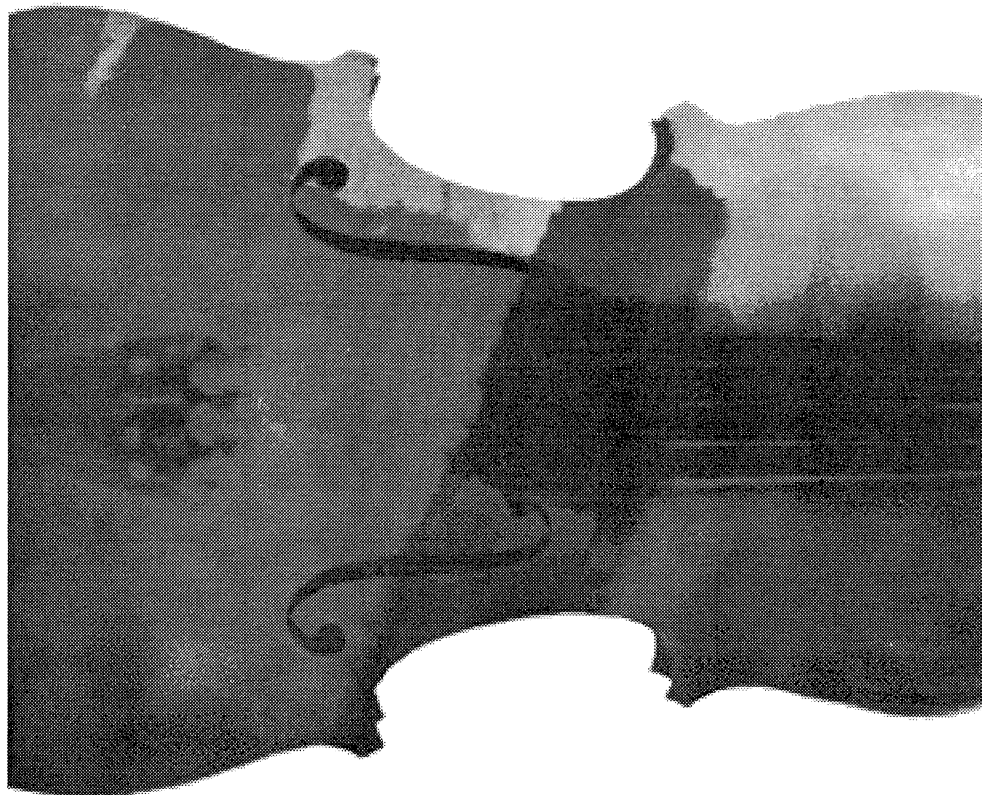

After an internship in San Francisco, he entered the army as Commanding Officer of a medical unit in France. In 1964, Leonard Shlain moved to New York where he began surgical training at Bellevue. He finished his residency in San Francisco and began practising general surgery there in 1969. Since then, he has received many distinctions as a surgeon and educator. Recently, he has pioneered the introduction of new techniques in video-assisted laparoscopy surgery. He presently holds five patents of endoscopic surgical services. He is Associate Professor of Surgery at USCF and is the Chief of Endoscopic Surgery at California Pacific Medical Center.

Leonard Shlain began his writing career in the late 70s and has contributed to many magazines and newspapers including the Los Angeles Times.

For the past ten years, Dr. Shlain has lectured widely on the connections between art and science at such prestigious and diverse groups as the Phillips Collection, California Academy of Sciences, Salk Institute, Aspen Institute, Los Alamos National Laboratory, and many museums and art institutes around the country.

In "Art and Physics", author Leonard Shlain proposes that the revolutionary artist, using image and metaphor, introduces a new way to see the world. This vision is usually so radical it repels the public. Later, the visionary physicist, using number and equation, perceives a new way to think about the world. If however, the image of the artist is superimposed upon the equations of the physicist, there is a striking fit.

The lecture will be given in English with simultaneous interpretation in French.
Open to the public
