CERN PARTICLE PHYSICS SEMINAR

Tuesday, August 29th
16.30 hrs.
Auditorium

"Backward π^-p scattering and $p\bar{p}$ annihilation into two mesons at
3 and 4 GeV/c"
S. Limentani / University of Padova

PHYSICS I - ELECTRONICS EXPERIMENTS COMMITTEE

Tuesday, August 29th
09.00 hrs
NP Conference Room

Closed Session

CERN COMPUTER SEMINAR

Monday, September 4th
16.00 hrs
Auditorium

"ARPA Network Design Experience"
Professor L. Kleinrock / University of California, Los Angeles

Abstract : The ARPA experimental computer network has been in existence for three years and during that time it has undergone considerable design, growth, analysis, simulation and measurement. These efforts have been directed toward understanding the behaviour and performance of the network under various conditions of load, connectivity, etc. In this presentation we review some of the design procedures and discuss the experience we have gained in conducting the analytical, simulation, and measurement activities.
