Seminars

Vendredi, 26 mai
17.00 précises

Université de Genève/Ecole de Physique
Auditoire B

"Théorie de la mesure (au sens de Lebesgue, Carathéodory, Nykodym)"

Dr J.L. Petit / Université de Brest

Tuesday, 30 May
16.30

Main Auditorium / CERN

"Precision Measurement of $g-2$ of muons"

J. Bailey / CERN

Thursday, 1 June
16.30

Main Auditorium / CERN

*COLLOQUIUM

"New Techniques using Slow Neutrons"

H. Maier-Leibnitz / Institute Max von Laue-Paul Langevin, Munich

Abstract : The paths of slow neutrons are affected by the refractive index of materials and by gravity. This has been used to contain neutrons in guide tubes and to build an interferometer and also a gravity refractometer which allows very precise determinations of cross-sections.

Good neutron mirrors can also be made, using Bragg back-scattering from good crystals. Such mirrors select an energy range of 10^{-7} eV.

Jeudi, 1er juin
17.00

Université de Genève / Ecole de Physique
Baraque C, salle 2

"Transistors FET et MOS"

Mme M. Sabev

* The CERN COLLOQUIA frequently cover questions outside the field of high-energy physics; the talks are given in English by leading experts. Sometimes the topic may also attract non-physicists. Therefore, the Colloquia are, in principle, open to everyone who is interested, including people from outside CERN (e.g. members of families and/or friends of CERN staff).

A series of informal lectures, seminars and discussions on the subject of:

'Interactions of mesons with nuclei'

will be held on Mondays at 11 a.m. in the Theoretical Division Conference Room, starting on 5 June 1967. The series is mainly intended for the junior members of the experimental groups in this field and will deal with both theoretical and experimental topics. The detailed subject matter will be a function of the wishes of the audience. All persons interested are welcome.

T. Ericson

Enseignement / Training and Education

ENSEIGNEMENT GENERAL ET TECHNIQUE

(Cours réservés aux élèves inscrits auprès de la Section de l'Enseignement)

Electronique (radio-fréquence)	mercredi 31 mai	17.45	Baraque E
Résistance des Matériaux	jeudi 1er juin	17.00	Salle Labo 4

ACADEMIC LECTURE SERIES

THEORETICAL PHYSICS

Friday 2 June
11.00
Main Auditorium

SELECTED TOPICS IN PARTICLE PHYSICS
by L. Van Hove
(2nd lecture)

Affaires Sociales/Welfare

RENCONTRES DE MIDI

Nous avons le plaisir d'annoncer la venue aux "Rencontres de Midi" de

Lundi 29 mai 1967
13.15 précises
Grand Auditorium

Monsieur Ch. BRATSCHI
Directeur de l'Aéroport de Cointrin

Il présentera:

Les problèmes d'un grand aéroport

Nous pensons que cette causerie intéressera tout particulièrement les personnes vivant à Meyrin (future piste pour avions supersoniques).
