The programme will consist of the following :

- Discussion and criticism of assigned books .
- Guest speakers.
- Student-presented talks on trips, hobbies, etc .
- Play readings.
- Debates.
- Mock courts and discussion of trial,

cern information

ACCROCHAGE

Les personnes susceptibles de donner des informations sur un accrochage qui a eu lieu avec une Lancia Touring rouge GE 13462 garée le 15 janvier 1970 au parking devant le PIO entre II.15 et 13.45 sont priées de s'adresser à Monsieur T. Blumer/ISR.(3373).

CONGES POUR LA FIN DE L'ANNEE

Les membres du personnel étaient autorisés de prendre deux jours de congé, vendredi le 26 décembre 1969 et vendredi le 2 janvier 1970 pour la perte du droit d'un jour de congé.

En vue des problèmes occasionnés par le calcul du congé des personnes qui ont travaillé en tout ou en partie ces deux jours, le Bureau des Remboursements et Congés :

1) ajoutera un jour de congé au droit de tous les membres du personnel au service de l'organisation ces deux jours en question. (ceux qui ont terminé le 31 décembre 1969 ou qui ont commencé le 1er janvier 1970 recevront un demi-jour de congé supplémentaire).

2) déduira à 100 % tous les congés pris l'un ou l'autre de ces jours.

Les formulaires "Demande de Congé" présentés par les membres du personnel pour la fin de l'année, seront modifiés en conséquence, et les Tableaux Récapitulatifs de Congé donnés au printemps indiqueront cet arrangement.

OFFICE MOVE

With effect from 19th January 1970, those offices of Personnel Division that are at present located in Laboratory 4 will be transferred to the 2nd, 3rd and 4th floors of Laboratory 5., Access will be possible via the 2nd floor of Laboratory 4 and from a new entrance on the Salève side, adjacent to the East Regional Stores. Some delay in the transfer of telephones will be inevitable , but the numbers will remain unchanged »

CHEST X-RAY EXAMINATIONS

The third chest X-ray campaign was conducted between 20 and 30 October, 1969 ; 2.350 people were examined. In addition, 300 people were X-rayed by the CERN Medical Service. We should like to thank those who came to be examined.

Once again, one case of contagious illness was discovered. We should therefore like to draw the particular attention of those 350 people who did not deem it necessary to submit to this routine examination to the serious consequences such an attitude might have. They will be invited to contact the Medical Service with a view to being X-rayed, either at CERN or by arrangement with their family doctor.

Other tests might be suggested to those who do not want to be X-rayed.

Those who persistently refuse examinations of any kind are reminded of the provisions of Article S II .3.17 of the Staff Regulations which state that refusal to be examined shall debar a staff member from lodging any claim against the Organisation for compensation in connection with illness contracted as a result of or during his period of service.

Dr J.P. Diss/Medical Service
