Seminars

Tuesday, 10 October
16.30

Main Auditorium / CERN

"Experimental aspects of intermediate and high energy collisions".
(Review from Heidelberg Conference)

L. Di Lella / CERN

Wednesday, 11 October
14.30

Theory Conference Room / CERN

"The Future of Information Engineering".

Professor S. Gill / Director of the Centre for Computing and Automation, Imperial College, London

Abstract : The nature of computing has changed considerably since the first electronic computers were built. It is now essentially a kind of engineering, but it has novel features that set it apart from other engineering subjects. The hardware is taking a less central place in the study of computing; the central theme is the algorithm, and the action of information upon information.

Thursday, 12 October
16.30

Main Auditorium / CERN

"Electron-Proton Scattering at SLAC".

A. Minten / CERN - SLAC

Monday, 16 October
11.00

Theory Conference Room / CERN

"Preliminary Results on π -C¹² Scattering".

J.P. Stroot / CERN

This is the first seminar this semester in a series of informal seminars, lectures and discussions on nuclear structure physics.
