Standard platinum sonde detectors, standard sheath thermocouples with couplings for chemical and petrochemical processes.

Machined alumina parts, alumina/metal brazing, 'high pressure' alumina connectors.

UHV components and systems, surface analysis system, molecular jet epitaxy system.

Photomultipliers, streak camera, very wide-band CRTs, image intensifiers (for CRTs).

Layout, location and routing software for use with portable printed circuits on VAX 11, MICROVAX II.

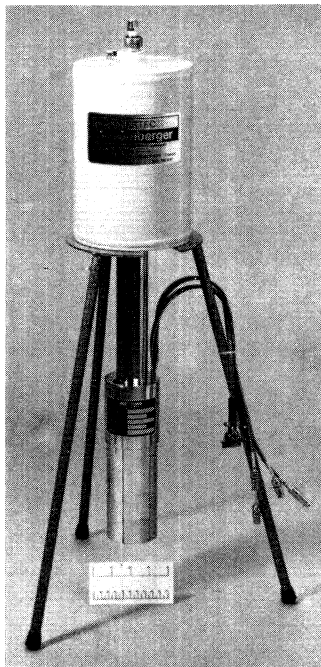

DLX: hardware and software range, monprocessor systems.

Specialized electric connectors for use in irradiated environments, tempered connectors and filters, optical fibre transmission systems.

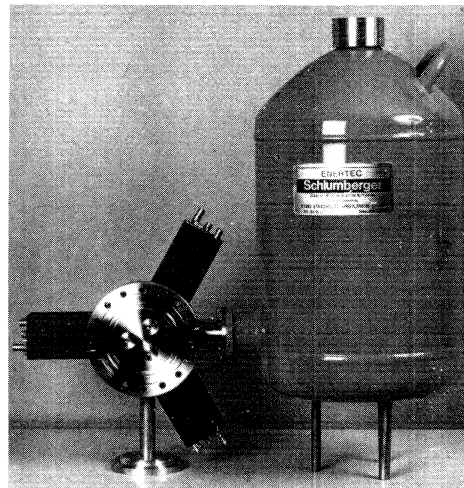

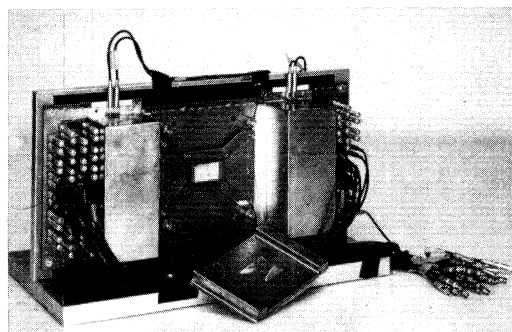

*Mini-computer (SM 90) and data display equipment (CUBI 7).
Products: SM 90 c CUBI 7: real-times 3-D image synthesis system.*

Professional electronic tubes and devices, klystrons for particle accelerators, photographic tubes, luminous image intensifiers, hyperfrequency windows.

Predisminated networks, filters, interfaces, microsystems, shielding components, power transistors, thyristors.

IMAGING?

We supply solutions...
from X-ray to IR

Detail of microchannel plate

Philips range of channel multipliers is comprehensive. It's also advanced, as illustrated by the 12.5 mm MCP with its open area of up to 80%... just one example of our contribution to progress over the last 20 years.

Used primarily as an amplifying element in image intensifiers, MCPs are also the 'eyes' of particle and VUV radiation satellite experiments.

Fibre-optic faceplate technology, combined with unmatched know-how in phosphor and photocathode technologies brings you the best in modern imaging.

For example, our XX1380 image intensifier features a resolution of over 50 line pairs/mm.

And our 16" PMT proposal for the DUMAND neutrino astrophysics collaboration enables ^{40}K ocean noise suppression by resolving single- and multi-electron events.

Other Philips advanced devices for imaging include:

- X-ray Image Intensifiers
- TV Camera Tubes
- CCD Imaging Devices
- High-resolution Image Intensifiers
- IR Thermal Imaging Devices

With Philips you therefore get single-stop shopping for all your imaging needs. For more information contact:
