MEETING OF THE STANDING ADVISORY COMMITTEE

On 10th June, the Committee held its monthly meeting. It reviewed the progress made in negotiations with the Member States in the field of reintegration into national Social Security Systems*.

The Committee also examined present CERN Health Insurance arrangements and their financial implications. Finally it discussed present cost accounting procedures in the SB Workshops.

* A résumé is available at the Social Services Secretariat, PE Division, Tel. 2486.

Cover photograph — Blessed are they who stand in front of the new BEBC piston structure and position their head at the axis. Emile Gastaud, a welder from the CERN workshops, had worked on the stainless steel structure of a new piston for the 3.7 m European bubble chamber, BEBC, when an observant photographer achieved this beatification. The piston is scheduled to be installed in the next few months prior to operation of the chamber with beams from the 400 GeV synchrotron. (Photo CERN 180.5.76.)
