While these lectures are prepared for Summer Students who are at CERN this summer, they are open to anyone at CERN. Many of these lectures treat topics at general level, so that they are a good opportunity for a staff member to find out more about something outside their daily work.

All lectures are given in English and held in the Auditorium, except the four lectures for non-physics students which will take place in the *Microcosm conference room (33 R-009). The complete programme (Word file) is available on the PE Division server:

- for PC users on the Novell network : attach to SRV1_PE as Guest
- for Mac users:
 - Appletalk zone PE Division
 - server SRV1_PE
 - username Guest
 - Chooser volume USR (folder Home>Guest>Summer)
