Main Auditorium / CERN

COLLOQUIUM

"Tides in the Atmosphere and in the Oceans"

C.L. Pekeris / Weizmann Institute, Rehovoth

Abstract : The general aspects of the solutions of Laplace's tidal equations will be discussed, followed by an exposition of the resonance theory of atmospheric tides. The main topic will be an account of the work done at the Weizmann Institute to solve Laplace's tidal equations for the lunar tide in the real world of oceans, taking into account the actual coast line and the measured topography of the ocean bottom.
