INFORMATIVE TALKS ON MANAGEMENT

Monday, 1 May	<u>"MANAGEMENT ASPECTS OF DECISION MAKING"</u>
14.15	by Prof. R. Revans (Manchester University)
Main Auditorium	

Prof. Revans studied at the Cavendish Laboratory, Cambridge, where he received his Ph.D. in physics. During the war he became involved in operational research and went to Manchester University of Science and Technology to teach in this field. He then began to take an interest in management sciences. Prof. Revans' education and experience, with bodies other than business firms, give him a grasp of things which may surely interest the CERN scientist whose concern is also managerial.
