## Seminars

Monday, 27 May

COLLOQUIUM

14.30

"Field Theory of Gravitation"

Main Auditorium / CERN

W. Thirring / Institute for Theoretical  
Physics, Vienna

Abstract : The lecture will present a discussion of the various empirical information on gravitation and what they imply if they are analysed in terms of standard field theories formed according to the pattern of electrodynamics. The outcome of this is that Einstein's theory is either the exact answer or at least very close to it.

Thursday, 30 May

"High Energy Scattering : a view of asymptopia"

16.30

S. Lindenbaum / Brookhaven

Main Auditorium / CERN

Jeudi, 30 mai

"Détermination par photoréactions de la dépendance en énergie et en spin de la densité des niveaux nucléaires"

17.15

Université de Genève / Ecole de Physique  
Auditoire EPB

Prof. H. Medicus / Rensselaer Polytechnic Institute,  
Troy, New York

We have been asked to announce that the

"Symposium on experimental methods in nuclear and particle physics"

which was scheduled to take place in Strasbourg from May 29 to 31, 1968, has been postponed and will now be held in October.

Participants will be informed individually as soon as the new date has been fixed.
