OFFICIAL NEWS

Members of the personnel shall be deemed to have taken note of the news under this heading

CIRCULAIRE ADMINISTRATIVE

La Circulaire Administrative No 13 : **Garanties accordées aux membres du personnel ayant un mandat de représentation** est maintenant publiée.

Elle est disponible *au Secrétariat de votre Division.*

J.F. Barthélemy
Tél. 2855

ADMINISTRATIVE CIRCULAR

The Administrative Circular No 13 : **Guarantees For Members Of The Personnel Holding Representative Office** is now published.

It is available *at the Secretariat of your Division.*

J.F. Barthélemy
Tel. 2855

SEMINARS **SEMINAIRES**

MONDAY 17 AUGUST

ISR SEMINAR

at 14.30 hrs - ISR Auditorium
(Top floor of Building 30)

"Status of the Tevatron"

by L. Lederman / Fermilab

TUESDAY 18 AUGUST

CERN PARTICLE PHYSICS SEMINAR

at 16.30 hrs - Auditorium *)

"Glueballs, Hermaphrodites and QCD Problems in Baryon Spectroscopy"

by F.E. Close / Rutherford

Abstract : This talk is an extended version of my Lisbon Conference report on hadron spectroscopy. Some problems for QCD in baryon spectroscopy will be advertised and discussed : claims to have seen glueballs will be evaluated and the possibility of hermaphrodites - states containing quarks and glue - will be mentioned.

*) Note : Those attending this seminar are cordially invited to the Salle des Pas Perdus (just outside the Council Chamber) at 16.00 hrs to meet the speaker and for informal discussions. Tea and coffee will be provided.

WEDNESDAY 19 AUGUST

THEORETICAL SEMINAR

at 14.00 hrs - Theory Conference Room

"GUTs and Cosmology"

by Q. Shafi / CERN

Abstract : The merger of GUTs and cosmology has several interesting consequences. Some of these will be discussed.

THURSDAY 20 AUGUST

INFORMAL DISCUSSION

at 14.00 hrs - Auditorium

"The Latest News from the TPC"

by M. Ronan / LBL

Abstract : We will report on the test conducted with the TPC using cosmic rays. A description of the proposed trigger scheme for the TPC will be given.

CERN COLLOQUIUM

at 16.30 hrs - Auditorium *)

"Asteroids and Dinosaurs"

by L. Alvarez / LBL

Abstract : Geochemical evidence, obtained recently by neutron activation analysis, indicates that the worldwide layer of clay deposited 65 million years ago, simultaneously with the Cretaceous-Tertiary extinction, is of extra-terrestrial (but solar system) origin. Several arguments set the size of the impacting object responsible for the demise of the dinosaurs, and 70% of all the then living species, at about 10 km. New measurements since this theory was advanced two years ago will be presented.

*) Note : Those attending this colloquium are cordially invited to the Salle des Pas Perdus (just outside the Council Chamber) at 16.00 hrs to meet the speaker and for informal discussions. Tea and coffee will be provided.

MONDAY 24 AUGUST

EP SEMINAR

at 17.00 hrs - Auditorium

"Production of Meson Resonances in K^+p Interactions in BEBC"

by S. Squarcia / CERN-EP
