

seminars

PHYSICS III SEMINAR

Monday, December 7
11.00
Theory Conference Room

"Spectroscopy of neutrons from μ capture"
W.U. Schröder / CERN - Technische Hochschule Darmstadt

CERN COLLOQUIUM

Tuesday, December 8
16.30
Council Chamber

"The theory of liquids : a revival of Van der Waals ideas"
L. Verlet / Orsay

Abstract : Van der Waals proposed in the 19th century to consider a liquid as composed of a hard-sphere gas perturbed by a soft potential. We shall use results obtained with the help of modern computing methods to show that these ideas are basically sound and can be generalized and used for describing simple liquids.

OPEN MEETING OF THE ISRC

Tuesday, December 8
14.30
Auditorium

"Presentation of proposals to search for quarks at the ISR"
N.E. Booth / Oxford University
D.O. Caldwell / University of California at Santa Barbara
and others

PHYSICS I - ELECTRONICS EXPERIMENTS COMMITTEES

Monday, December 7
14.30
Auditorium

OPEN SESSION
The following items will be discussed :

- 1) A proposal to study the production of cascade particles from K^-p interactions, by T.A. Broome, K.J. Davies, B.G. Duff, R.C. Hanna, D.C. Imrie, G.J. Lush, D.R. Quarrie, L.A. Robbins, E.J. Sacharidis, A.D. Smith, D.H. White, and E.G. Xereas (University College London-Rutherford High Energy Laboratory);
- 2) Development of slow ejection and targetting at the PS, by G. Plass.

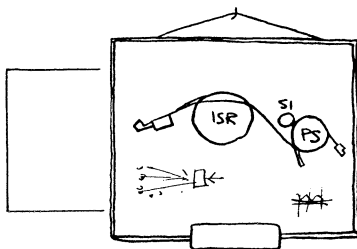

Tuesday, December 8
09.30
NP Conference Room

CLOSED SESSION

CERN PARTICLE PHYSICS SEMINAR

Tuesday, December 15
16.30
Auditorium

"Elastic scattering of K^+ , π^+ and $\bar{p}$ on protons at 5 GeV/c :
Evidence for exotic exchanges"
M. Davier / Orsay

enseignement

ENSEIGNEMENT TECHNIQUE

"Programmation et Fortran"

La leçon du lundi 7 décembre est annulée en raison de la non-disponibilité de l'amphithéâtre.

ACADEMIC TRAINING

Tuesday, December 8
11.00
Theory Conference Room

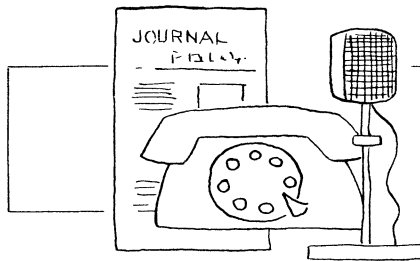

APPLIED MATHEMATICS

"Properties of solutions of ordinary non-linear differential equations"
I. Gumowski (6th lecture)

Tuesday, December 8
14.15
Council Chamber
AND
Friday, December 11
14.15
Auditorium

APPLIED MATHEMATICS

"Programming in assembler language for the CDC 6000 series computers"
H. von Eicken
(8th and 9th lectures)

cern information

AUX UTILISATEURS DES MAGASINS

Au début de 1971, comme au début de chaque année, un certain nombre de cartes d'utilisateurs des magasins seront renouvelées pour différentes raisons.

A cette occasion des instructions seront données au personnel des magasins, d'entente avec le Comité des Utilisateurs, pour appliquer le principe "sans carte, pas de matériel". Cette discipline est nécessaire afin de permettre aux divisions le contrôle de leurs dépenses. Tous les utilisateurs voudront donc bien se munir de leur carte chaque fois qu'ils se présenteront aux magasins.

Division des Finances

CAR OWNERS : SUGGESTION

If you have the habit of leaving your lights on in the car-park in the morning you probably have already ruined your battery and purchased a new one, so you need not read further. For those likely to be forgetful in the future the following suggestion may help you : Place a sticker on your windscreen (Top corner) marked with your internal phone extension. This will allow kind colleagues to inform you immediately.

(I. Pizer/NP)

ISSUE OF NEW 'CARTES DE LEGITIMATION'

The Swiss authorities have issued a new series of 'Cartes de Légitimation' to replace all the cards held by members of the personnel and their families. Existing cards will become invalid on their date of expiry, but new cards will be issued to replace them earlier, on the request of the staff member. There is no change in the privileges accorded by the cards.

To obtain a new card, please forward 4 passport photographs (with your name and division noted on the back) to the Personnel Records Office, Personnel Division. If you require cards for members of your family, you should provide 4 passport photographs of the persons concerned, noting their names on the back together with your name and division. Photographs from an automatic machine are accepted : a new automatic machine, which should produce photographs of better quality than the earlier device, has been installed in the basement of the Administration Building, adjacent to the Record Club cupboards.

When you receive your new card, you should return the old one to the Personnel Records Office.

There is no change in the arrangements for 'CERN Attestation' cards; their period of validity is extended, on expiration, as necessary.

Personnel Division
