Members of the personnel shall be deemed to have taken note of the news under this heading.

Reproduction of all or part of this information by persons or institutions external to the Organization requires the prior approval of the CERN management.

COMITÉ DE CONCERTATION PERMANENT

A sa réunion du 22 octobre 1991, le Comité de concertation permanent a approuvé le texte d'un memorandum demandant au Directeur général de prendre une décision sur les points encore en suspens de la nouvelle circulaire administrative N° 26 intitulée 'Entretien annuel, avancement et changement de filière de carrière', qui a été modifiée par un groupe de travail paritaire du Comité.

Une proposition de porter de 0,40 CHF à 0,65 CHF l'indemnité kilométrique pour l'utilisation de véhicules privés pour des voyages officiels a été approuvée et il a été convenu de recommander au Directeur général de présenter cette proposition au Comité des finances en décembre. La circulaire administrative N° 20 sur ce sujet doit elle aussi être révisée.

Des propositions de relever, pour tenir compte de l'inflation, les plafonds de remboursement pour les repas et le logement accordés au titre de l'allocation pour frais d'études, ainsi que les plafonds de l'allocation elle-même, ont été approuvées et seront recommandées au Directeur général.

N.F. Blackburne a présenté un rapport d'un groupe de travail sur les organisations de référence utilisées pour les examens des conditions d'emploi. Le Comité a estimé que ces organisations devraient avoir un caractère européen plutôt que mondial ou national et qu'elles devraient utiliser des systèmes d'indexation des salaires, etc. aussi simples que possible. Les mêmes organisations devraient être utilisées pour l'adaptation annuelle des traitements et pour les examens quinquennaux des traitements. Il a été demandé au Groupe de travail de préparer des informations supplémentaires pour des étapes futures.

Les dispositions à prendre pour la fermeture de fin d'année du Laboratoire ont été discutées et il a été convenu que tous les membres du personnel devront prendre congé, exception faite pour ceux qui seront réquisitionnés pour les besoins essentiels du service, et que dans ce cas les intéressés devront normalement en recevoir notification avant la fin de novembre.

STANDING CONCERTATION COMMITTEE

At the meeting of the Standing Concertation Committee on 22 October 1991 the Committee agreed on the text of a memorandum asking the Director-General to decide on the remaining outstanding points in the new Administrative Circular No. 26 entitled 'Annual interview, advancement and change of career path', which had been amended by a joint Working Group of the Committee.

A proposal to increase the allowance for the use of private cars for official travel from 0.40 CHF to 0.65 CHF per kilometre was approved and it was agreed to recommend the Director-General to present the proposal to Finance Committee in December. The Administrative Circular No. 20 on this subject is also to be revised.

Proposals to increase for inflation the maximum amounts allowed for meals and accommodation in the Education Grant, and the ceilings of the Grant itself, were approved and will be recommended to the Director-General.

N.F. Blackburne presented a report by a Working Group on the reference organizations used for reviews of conditions of service. It was considered that the organizations should be European rather than world-wide or national in their scope, and that they should operate systems of salary indexation, etc which are as simple as possible. The same organizations should be used for the annual salary adjustment as for the 5 yearly salary reviews. The Working Group was asked to prepare more information for future developments.

The arrangements for the end-of-year closure were discussed, and it was agreed that all staff should take leave unless they are required for the essential needs of the service, and that those who will be required should normally be notified before the end of November.

A Working Group is to be set up to examine questions of taxation in France.

The representatives of the Management agreed that the recent Weekly Bulletin announcement concerning Internal mobility represented a transitory step, enabling the moratorium on internal transfers to be lifted, pending

Un groupe de travail sera créé pour examiner les questions d'imposition en France.

Les représentants de la Direction ont convenu que l'annonce parue récemment dans le Bulletin hebdomadaire et concernant la mobilité interne représente une mesure transitoire, permettant de lever le moratoire sur les transferts internes en attendant la révision prochaine des Statut et Règlement du personnel.

La prochaine réunion du Comité aura lieu le 12 novembre 1991.

the forthcoming revision of the Staff Rules and Regulations.

The next meeting of the Committee will take place on 12 November 1991.

Physics results at LEP

by J. STEINBERGER / CERN-PPE

The four LEP collaborations together have accumulated some two million events in the first two years of operation. The data are of very high quality and have yielded important results chiefly in the domain of the electroweak interaction but also in checks of QCD, and have provided limits on the masses of the Higgs as well as supersymmetric particles. The b quarks as well as τ leptons produced in Z decay are proving useful in the study of some properties of these particles.

Tuesday 5 November

SPS AND LEAR EXPERIMENTS COMMITTEE

Open session

at 09.00 hrs – Auditorium
(to be continued at 14.00 hrs)

1. Study of muon pairs and vector mesons produced in high energy lead-lead interactions (LAPP, CNRS-IN2P3, Annecy-le-Vieux - LPC, Clermont-Ferrand - CERN - LIP, Lisbon - IPN, Univ. de Paris-Sud, and CNRS-IN2P3, Orsay-LPNHE, Ecole Polytechnique, and CNRS-IN2P3, Palaiseau - CRN, CNRS-IN2P3, and Univ. Louis Pasteur, Strasbourg - Univ. and INFN Torino - IPN, Univ. de Lyon, and CNRS-IN2P3, Villeurbanne; SPSLC 91-55 / P 265): L. Kluberg.
2. Status report from PS196 Precision comparison of π and p masses in a Penning trap: G. Gabrielse.
3. Status report from PS197 The Crystal Barrel: Meson spectroscopy at LEAR with a 4π neutral and charged detector: K. Koenigsmaann.

4. Status report from WA89 Hyperon beam experiment and memorandum Beam time request (SPSLC 91-54 / M 477): H.W. Siebert.
5. Status report from WA92 Measurement of beauty particle lifetimes and hadro-production cross-section: L. Rossi.
6. Status report from 'NA48': B. Peyaud.

Closed session

Tuesday 5 November at 15.30 hrs
to be continued on Wednesday 6 November at 09.00 hrs, 6th floor Conference Room.

VMEbus-based open real time solutions from Heurikon

by David TANNER / Heurikon

Heurikon is an important supplier of VMEbus equipment in the USA, and in particular places a strong emphasis on providing solutions to real-time problems. This presentation will focus on Heurikon's system integration strategy and custom design skills, as well as on its Multibus I, Multibus II and VMEbus product families. A detailed discussion of Heurikon's low cost VMEbus products and expandable CPU families will follow, including a description of the COREBUS concept as a means of expanding VMEbus platforms, independent of processor architecture. Future products will be presented including DSP solutions based on the AT&T DSP32C chip sets, with specific mention of the software support environments, and high performance serial I/O targeted at real time data capture. Heurikon's strategy for open real time software which includes OS-9, VxWorks and
