Working in a place like
nowhere else on earth....

The place for your next career step?

People at CERN are driven by a shared goal, a single purpose. They want to achieve the impossible, to do what's never been done before. Everyone here strives to be the best they can be, true specialists and industry "firsts" are created regularly –not just in the world of physics. The engineering and technical skills needed to make the experiments succeed are as world-class as the science behind them.

CERN will be recruiting over 150 people this year. So if you're looking for a new challenge in engineering & technical fields, check out the diverse opportunities CERN has to offer on cern.ch/jobs. Take part!

Human Resources

SFB 1258

Several PhD Positions at the Technical University of Munich (TUM) on Experimental and Theoretical Aspects of Neutrinos and Dark Matter

We are looking for highly qualified and motivated students holding an MSc or equivalent degree in physics or astrophysics to pursue doctoral research at the Munich School on Neutrinos and Dark Matter.

The School is an Integrated Research Training Group within the recently founded SFB1258 "Neutrinos and Dark Matter in Astro- and Particle Physics" (www.sfb1258.de). SFB1258 is based at the Technical University of Munich (TUM) in collaboration with the Max-Planck-Institut für Physik (MPP), Max-Planck-Institut für Extraterrestrische Physik (MPE), Max-Planck-Institut für Astrophysik (MPA), European Southern Observatory (ESO), and the Institut für Hochenergiephysik (HEPHY) der Österreichischen Akademie der Wissenschaften.

We are offering PhD positions in Physics on various experimental as well as theoretical topics on neutrino properties, neutrino astronomy at low and high energies, the particle nature of dark matter, axion searches, and supernovae processes including the investigation of stellar matter.

We offer participation in running and future experiments like CRESST, FERMI, GERDA/LEGEND, IceCube, IceCube-Gen2, JUNO, KATRIN, SOX, and our local infrastructures, including the Maier-Leibnitz tandem accelerator laboratory.

For further information and application details please visit: <http://www.sfb1258.de/graduate-school/>

IHEP Recruitment of Overseas High-level Talents

Institute of High Energy Physics, Chinese Academy of Sciences

The Institute of High Energy Physics (IHEP) of the Chinese Academy of Sciences (CAS) invites applications for permanent staff positions at all levels. IHEP is a comprehensive research laboratory for particle and astroparticle physics, accelerator physics and technology, radiation technologies and applications, as well as for nuclear analytical techniques and interdisciplinary research.

For More Information: <http://english.ihep.cas.cn/>

Recruitment Objectives:

Based on the needs of the research areas and the disciplines development of IHEP, we are now publicly recruiting overseas outstanding talents and scholars of relevant disciplines who possess research abilities and innovation awareness.

Programs:

- 1 National "Thousand Talents Program" (full time & part time programs) for established scientists.
- 2 National "Thousand Young Talents Program" for outstanding junior scientists.
- 3 Pioneer "Hundred Talents Program" of CAS, for outstanding junior scientists, excellent junior detector or accelerator experts.
- 4 "Outstanding Talents Program" of IHEP, for scientific research or technical talents.

Research Areas:

Experimental Particle and Nuclear Physics, Theoretical Physics, Astronomy and Astrophysics, Nuclear Technology, Multidisciplinary Research, Accelerators, Neutron physics, Condensed matter physics

Contact:

Division for Human Resources, Institute of High Energy Physics, Chinese Academy of Sciences

E-mail: hehl@ihep.ac.cn

Tel: (86)010-88235879, Fax: (86)010-88233102

Address: No. 19 (B), Yuquan Road, Shijingshan District, Beijing, (Postcode: 100049)

Applications should include a CV, an outline of academic accomplishments, description of current research and plan for future research, 3 – 5 published papers representative of your work, and a record of citations for your work. You should arrange for 3 letters of reference from experts in your field to be sent by post or email (established scientists are not requested).

For detailed information please visit

Senior and Junior Researchers, Postdoctoral research assistants, PhD students, Engineers, Physicists and Technicians at Extreme Light Infrastructure – Nuclear Physics (ELI-NP)

Extreme Light Infrastructure – Nuclear Physics (ELI-NP) will be the most advanced research infrastructure in the world focusing on photonuclear physics studies and applications, implemented by the the Horia Hulubei National Institute of Physics and Nuclear Engineering (IFIN-HH) in Bucharest – Magurele, Romania.

ELI-NP is a complex facility which will host two state-of-the-art equipment of high performances:

- A very High Power Laser System with two 10PW arms based on Optical Parametric Chirped Pulse Amplification, able to reach intensities of 10^{23} W/cm² and electrical fields of 10^{15} V/m;
- A very intense, brilliant Gamma Beam System, ~ 0.1 % bandwidth, with E_γ up to 19.5 MeV, which is obtained by incoherent Compton back scattering of a laser light off a very intense electron beam (E_e up to 720 MeV) produced by a warm LINAC.

IFIN-HH – ELI-NP is organizing competitions for filling the following positions:

Senior and Junior Researchers, Postdoctoral research assistants, PhD students, Engineers/ Physicists (laser engineers for 10PW lasers, particle accelerators, electrical, electronics, control systems, detectors, DAQ, optics) and Technicians (vacuum systems-laser operations, vacuum R&D, detectors and spectroscopy, DAQ and control systems)

The jobs description, the Candidate's profiles and the Rules of Procedures of Selection can be found at

<http://www.eli-np.ro/jobs.php>.

The applications shall be accompanied by the documents required in the Rules and Procedures of Selection for these positions

The applications shall be sent to the Human Resources Department at human.resources@eli-np.ro.

VERIFY AND OPTIMIZE YOUR DESIGNS

with COMSOL Multiphysics®

The evolution of computational tools for numerical simulation of physics-based systems has reached a major milestone.

Surpass design challenges with ease using COMSOL Multiphysics®. Work with its powerful mathematical modeling tools and solver technology to deliver accurate and comprehensive simulation results.

Develop custom applications using the Application Builder and deploy them within your organization and to customers worldwide with a local installation of COMSOL Server™.

MT25

Hosted by **UNIVERSITY OF TWENTE**

The 25th International Conference on Magnet Technology

Amsterdam, the Netherlands
August 27-September 1, 2017

- Magnets for Particle and Nuclear Physics, Fusion, High-Field Facilities, Medical, Biological, and Analytical Applications.
- Coils for Power, Energy, Transport, and Other Applications
- Materials, and Associated Technologies for Magnets
- Magnet Test, Analysis, and Design Tools

Conference Chair - Herman ten Kate
Co-chair - Andries den Ouden
Program Chair - Arjan Verweij
Exhibition Manager - Arend Nijhuis
