PHYSICS I - ELECTRONICS EXPERIMENTS COMMITTEE

Monday, June 29

14.30

Auditorium

OPEN SESSION

"Proposal for a precise measurement of $K_{e2}/K_{\mu2}$ branching ratio"

CERN-Heidelberg Group

PH I/COM-70/25

CLOSED SESSION

Tuesday, June 30

9.30

NP Conference Room

CERN APPLIED SCIENCE SEMINAR

Thursday, July 9

14.30

MPS Conference Room

"Some aspects of slow ejection from the CPS"

K.H. Kissler / MPS Division

Abstract : After a short general introduction a scheme for half-integral resonant ejection from the CPS will be discussed. Its main properties will be compared with those of the integral and third integral resonant ejections. The problem of sharing the CPS beam simultaneously between a slow ejection and an internal target will be touched on.

CERN PARTICLE PHYSICS SEMINAR

Tuesday, June 30

16.30

Auditorium

"An introduction to highly Inelastic Lepton Scattering and related processes"

C.H. Llewellyn-Smith / CERN

cern information

NEW PROCEDURE FOR RECORDING LEAVE

A new procedure has been introduced from 1st April 1970 for authorizing and recording leave.

A leave request form will be kept for each person by Divisional Secretaries (Group Secretaries in the case of MPS, SI and FE/SERP). The form, which has been modified to accommodate a whole year's record, must be filled in at the Secretariat each time you wish to take annual leave.

In the event of sick leave, you must notify the Secretariat on the first day of absence, and on the day that you return to work.

You are reminded that the Divisional Secretary must be notified of all accidents (professional and non-professional) even if the Security Service have been informed.
